Forensic Science International, 43 (1989) 295–298
Elsevier Scientific Publishers Ireland Ltd.

SUBJECT INDEX
Volume 43 (1989)

ABO and Lewis grouping, ELISA, nitrocellulose membrane, 171
ABO blood groups, mummies, absorption-elution, mixed agglutination, immunofluoresence, 113
ABO grouping, penile swabs, body fluid tests, sexual offences, 63
Absorption-elution, ABO blood groups, mummies, mixed agglutination, immunofluoresence, 113
Acceleration and deformation, wounds and injuries, cerebral contusion, intracranial pressure change, modal analysis, physical model, 159
Analytical precision, breath alcohol, homogeneity of variances, 247
α_1-Antitrypsin, bloodstains, hybrid isoelectric focusing, transferrin, orosomucoid, 239
Asphyxia and thymus hemorrhages, sudden infant death syndrome (SIDS), non-SIDS, thymus hemorrhages, 1
Autopsy, hydrogen cyanide, carbon monoxide, fire deaths, 9

Bacteria, postmortem ethanol, blood, vitreous humour, fungi, 37
Biotin labelling, DNA fingerprints, hypervariable minisatellites, paternity testing, Southern blots, 275
Blood, postmortem ethanol, vitreous humour, bacteria, fungi, 37
Bloodstains, hybrid isoelectric focusing, α_1-antitrypsin, transferrin, orosomucoid, 239
Body fluid tests, penile swabs, ABO grouping, sexual offences, 63
Breath alcohol, homogeneity of variances, analytical precision, 247

Carbon monoxide, hydrogen cyanide, fire deaths, autopsy, 9
Cerebral contusion, wounds and injuries, intracranial pressure change, acceleration and deformation, modal analysis, physical model, 159
Chronic intoxications, heroin, drug abusers, seminiferous tubules, histopathology, 97
Cocaine, pseudoecgonine methyl ester, pseudococaine, synthesis, 93
Colour, microspectrophotometry, paint, vehicles, identification, 183
Courier 10, image processing, size of characters, printwheels, document examination, Elite 12, 125
Criminology of intravenous drug abuse, drug death, narcotics, heroin, foreign-body granulomas, hepatitis, HIV-1 infection, 223

Designer drug, fentanyl, vapor phase, gas chromatography/Fourier transform-infrared spectrometry, 15
Detection of muscle relaxants, suicides committed with muscle relaxants, 257
Diaphragm, sudden infant death syndrome, necrosis, 281
DNA fingerprints, biotin labelling, hypervariable minisatellites, paternity testing, Southern blots, 275
Document examination, image processing, size of characters, printwheels, Courier 10, Elite 12, 125 Drug abusers, heroin, seminiferous tubules, histopathology, chronic intoxications, 97
Drug death, narcotics, heroin, criminology of intravenous drug abuse, foreign-body granulomas, hepatitis, HIV-1 infection, 223

ELISA, ABO and Lewis grouping, nitrocellulose membrane, 171
Elite 12, image processing, size of characters, printwheels, document examination, Courier 10, 125

Fentanyl, designer drug, vapor phase, gas chromatography/Fourier transform-infrared spectrometry, 15

Fire deaths, hydrogen cyanide, carbon monoxide, autopsy, 9
Foreign-body granulomas, drug death, narcotics, heroin, criminology of intravenous drug abuse, hepatitis, HIV-1 infection, 223
Forensic medicine, immunoassay, monoclonal antibody, human semen, 27
Fungi, postmortem ethanol, blood, vitreous humour, bacteria, 37

Gas chromatography, pethidine, norpethidine, phenoperidine, 267
Gas chromatography/Fourier transform-infrared spectrometry, designer drug, fentanyl, vapor phase, 15
Greyhound urine, radioreceptor assay, radioimmunoassay, triazolam, 199
Group-specific component, pathology and biology, urine, isoelectric focusing, immunoblot, nitrocellulose, ultrathin polyacrylamide, 215

Hepatitis, drug death, narcotics, heroin, criminology of intravenous drug abuse, foreign-body granulomas, HIV-1 infection, 223
Heroin, drug abusers, seminiferous tubules, histopathology, chronic intoxications, 97
Heroin, drug death, narcotics, criminology of intravenous drug abuse, foreign-body granulomas, hepatitis, HIV-1 infection, 223
Histopathology, heroin, drug abusers, seminiferous tubules, chronic intoxications, 97
HIV-1 infection, drug death, narcotics, heroin, criminology of intravenous drug abuse, foreign-body granulomas, hepatitis, 223
Homogeneity of variances, breath alcohol, analytical precision, 247
Human semen, immunoassay, monoclonal antibody, forensic medicine, 27
Hybrid isoelectric focusing, bloodstains, α_1-antitrypsin, transferrin, orosomucoid, 239
Hydrogen cyanide, carbon monoxide, fire deaths, autopsy, 9
Hypervariable minisatellites, biotin labelling, DNA fingerprints, paternity testing, Southern blots, 275

Identification, microspectrophotometry, paint, vehicles, colour, 183
Image processing, size of characters, printwheels, document examination, Courier 10, Elite 12, 125
Immunoassay, monoclonal antibody, human semen, forensic medicine, 27
Immunoblot, pathology and biology, urine, group-specific component, isoelectric focusing, nitrocellulose, ultrathin polyacrylamide, 215
Immunofluoresence, ABO blood groups, mummies, absorption-elution, mixed agglutination, 113
Incised wounds, Scanning Electron Microscopy, 21
Infra-red spectroscopy, plastic sidelights, vehicles, thin-layer chromatography, ultra-violet/visible spectroscopy, 51
Intracranial pressure change, wounds and injuries, cerebral contusion, acceleration and deformation, modal analysis, physical model, 159
Isoelectric focusing, pathology and biology, urine, group-specific component, immunoblot, nitrocellulose, ultrathin polyacrylamide, 215
Isomers, methylaminorex, spectral distinction, 83

Methylaminorex, isomers, spectral distinction, 83
Microspectrophotometry, paint, vehicles, colour, identification, 183
Mixed agglutination, ABO blood groups, mummies, absorption-elution, immunofluoresence, 113
Modal analysis, wounds and injuries, cerebral contusion, intracranial pressure change, acceleration and deformation, physical model, 159
Monoclonal antibody, immunoassay, human semen, forensic medicine, 27
Mummies, ABO blood groups, absorption-elution, mixed agglutination, immunofluoresence, 113

Narcotics, drug death, heroin, criminology of intravenous drug abuse, foreign-body granulomas, hepatitis, HIV-1 infection, 223
Necrosis, sudden infant death syndrome, diaphragm, 281
Nitrocellulose, pathology and biology, urine, group-specific component, isoelectric focusing, immunoblot, ultrathin polyacrylamide, 215

Nitrocellulose membrane, ABO and Lewis grouping, ELISA, 171
Non-SIDS, sudden infant death syndrome (SIDS), thymus hemorrhages, asphyxia and thymus hemorrhages, 1
Norpethidine, pethidine, phenoperidine, gas chromatography, 267

Orosomucoid, bloodstains, hybrid isoelectric focusing, α_1-antitrypsin, transferrin, 239

Paint, microspectrophotometry, vehicles, colour, identification, 183
Paternity testing, biotin labelling, DNA fingerprints, hypervariable minisatellites, Southern blots, 275
Pathology and biology, urine, group-specific component, isoelectric focusing, immunoblot, nitrocellulose, ultrathin polyacrylamide, 215
Penile swabs, body fluid tests, ABO grouping, sexual offences, 63
Pethidine, norpethidine, phenoperidine, gas chromatography, 267
Phenoperidine, pethidine, norpethidine, gas chromatography, 267
Physical model, wounds and injuries, cerebral contusion, intracranial pressure change, acceleration and deformation, modal analysis, 159
Plastic sidelights, vehicles, infra-red spectroscopy, thin-layer chromatography, ultra-violet/visible spectroscopy, 51
Postmortem ethanol, blood, vitreous humour, bacteria, fungi, 37
Printwheels, image processing, size of characters, document examination, Courier 10, Elite 12, 125
Pseudococaine, cocaine, pseudoecgonine methyl ester, synthesis, 93
Pseudoecgonine methyl ester, cocaine, pseudococaine, synthesis, 93
Pyrolysis-gas chromatography, rubber shoes, tyres, trace rubber residues, relative retention time, 45

Radioimmunoassay, radioreceptor assay, triazolam, greyhound urine, 199
Radioreceptor assay, radioimmunoassay, triazolam, greyhound urine, 199
Relative retention time, pyrolysis-gas chromatography, rubber shoes, tyres, trace rubber residues, 45
Rubber shoes, pyrolysis-gas chromatography, tyres, trace rubber residues, relative retention time, 45

Scanning Electron Microscopy, incised wounds, 21
Seminiferous tubules, heroin, drug abusers, histopathology, chronic intoxications, 97
Sexual offences, penile swabs, body fluid tests, ABO grouping, 63
Size of characters, image processing, printwheels, document examination, Courier 10, Elite 12, 125
Southern blots, biotin labelling, DNA fingerprints, hypervariable minisatellites, paternity testing, 275
Spectral distinction, methylaminorex, isomers, 83
Sudden infant death syndrome, diaphragm, necrosis, 281
Sudden infant death syndrome (SIDS), non-SIDS, thymus hemorrhages, asphyxia and thymus hemorrhages, 1
Suicides committed with muscle relaxants, detection of muscle relaxants, 257
Synthesis, cocaine, pseudoecgonine methyl ester, pseudococaine, 93

Thin-layer chromatography, plastic sidelights, vehicles, infra-red spectroscopy, ultra-violet/visible spectroscopy, 51
Thymus hemorrhages, sudden infant death syndrome (SIDS), non-SIDS, asphyxia and thymus hemorrhages, 1
Trace rubber residues, pyrolysis-gas chromatography, rubber shoes, tyres, relative retention time, 45
Transferrin, bloodstains, hybrid isoelectric focusing, α_1-antitrypsin, orosomucoid, 239
Triazolam, radioreceptor assay, radioimmunoassay, greyhound urine, 199
Tyres, pyrolysis-gas chromatography, rubber shoes, trace rubber residues, relative retention time, 45

Ultra-violet/visible spectroscopy, plastic sidelights, vehicles, infra-red spectroscopy, thin-layer chromatography, 51
Ultrathin polyacrylamide, pathology and biology, urine, group-specific component, isoelectric focusing, immunoblot, nitrocellulose, 215
Urine, pathology and biology, group-specific component, isoelectric focusing, immunoblot, nitrocellulose, ultrathin polyacrylamide, 215

Vapor phase, designer drug, fentanyl, gas chromatography/Fourier transform-infrared spectrometry, 15
Vehicles, microspectrophotometry, paint, colour, identification, 183
Vehicles, plastic sidelights, infra-red spectroscopy, thin-layer chromatography, ultra-violet/visible spectroscopy, 51
Vitreous humour, postmortem ethanol, blood, bacteria, fungi, 37

Wounds and injuries, cerebral contusion, intracranial pressure change, acceleration and deformation, modal analysis, physical model, 159
